We make our covers stronger... to keep your family safer!

Mesh and Solid Safety Pool Covers

We make it strong. We make it easy.™
Coverstar – the strongest name in swimming pool safety covers!

A Coverstar mesh or solid safety cover is the strongest way to prevent children and pets from getting into your pool when you can’t be there. Custom-built to fit your pool perfectly and manufactured from best-in-class materials, a Coverstar cover is the best protection available for your family and your pool investment!

We make it strong…to keep your family safe!
The stronger the cover, the safer the cover. Coverstar applies exclusive, patented design and manufacturing innovations to give our mesh and solid safety covers unmatched strength and durability.

We make it easy…to install and maintain.
Unique features such as our exclusive center web and extra-long installation tool make it fast and easy to install and remove your Coverstar cover. All Coverstar covers keep debris out of your pool, and block virtually all sunlight – so you save on chemicals and enjoy cleaner water at opening time.

A Coverstar Safety Cover eliminates this ugly, dangerous mess from your backyard! (Did you really want to drain and clean that?)

Ovals, kidneys, even pools with custom shapes, raised walls, stairs, rails or water features – we’ll create a Coverstar cover that will cover any pool beautifully…and safely!
Strength you can rely on!

So many reasons why a Coverstar cover is your safest choice.

Interlocking Seams for Extra Strength!
A safety cover is only as strong as its seams, potentially its weakest point. Only Coverstar uses interlocked and double overlapped seams to dramatically improve weight transfer from the cover material to the seams and webbing! There’s simply nothing stronger!

UV Resistant Thread
Our extra-durable thread resists sun damage and pool chemicals.

Double Reinforcement
To provide additional strength for high-stress areas, we use bar and box tack reinforcement on all perimeter straps - a Coverstar exclusive!

Custom Heavy-Duty Hardware
All 9000MX, 7000MS and 1000V series covers come with our low profile, heavy duty double springs. D-rings ensure your cover lies flat and fits tight for optimum safety while corrosion resistant brass anchors provide the ultimate combination of strength and durability.

Double Decker Edge
The perimeter of most covers can fray and unravel. Our cover material is first hemmed, then sandwiched between double layers of webbing around the perimeter, so the edge can’t unravel!

Less Wear and Tear
Heavy duty vinyl nosing pads protect the cover against wear from coping and steps.

Webbing Won’t Abrade
Chafing strip sewn to bottom of cover protects the cover webbing from coping abrasion wear - and won’t mark the coping, like other strips!

All Coverstar mesh and solid safety covers exceed ASTM standards when properly installed.
Coverstar also manufactures the world’s best-built automatic safety covers, with push-button convenience. For more information, contact your Coverstar dealer or call us at 800-617-7283.

So many NEW reasons why to buy a Coverstar cover.

**Coverstar Exclusives**

**Sterling Silver**
Flush Wall Anchor
The SS flush wall anchor is pushed in and tightened after the cover is removed. This provides a clean look as the anchor head remains flush with the raised wall.

**Snap-On Perimeter Padding**
The Snap-On Perimeter Padding can be installed in specific locations to protect the cover from chaffing damage. The padding easily snaps onto the webbing and can be cut to size as needed.

The right cover to fit your needs... and perfectly fit your pool!

Coverstar offers mesh covers for maximum drainage and solid covers that block 100% of sunlight – in a variety of material weights and colors. All can be custom designed to fit any size or shape pool precisely, including any special features such as raised walls, diving boards, stairs and rail.

**Mesh Safety Covers**

9000MX™ **Max Shade Mesh**
- 99% shade, heavy duty self-draining mesh – 25 year warranty
- Engineered for maximum protection
