## Section 2: Facility Wide Substance Reporting

Acetone and styrene were identified as reportable pursuant to Ontario Regulation 455/09 (Toxic Reduction Act), as summarized in Table D-1. See Appendix C for more detail.

Table D-1. Facility Wide TRA Substances

Substance	CAS #	Total Usage (tonnes/yr)	Creation (tonnes/year)	Destroyed (tonnes/year)	Emission Rate (tonnes/yr)
Ethyl alcohol	64-17-5	0	0	0	0
Styrene	100-42-5	55	0	0	6.04
Acetone	67-64-1	3.59	0	49	3.59

It is noted that ethyl alcohol was fully eliminated from the process in 2015, and a TRA exit record was submitted with the 2016 SWIM report.

There has been a decrease in the amount of styrene and acetone entering the process and released to air due to a decrease in production levels for 2018.

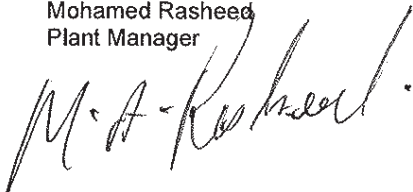

There are no plans to reduce acetone and styrene use.

## Section 3: Certification by Highest Ranking Employee

As of June 1, 2019, I, Mohamed Rasheed certify that I have read the report on the toxic substance tracking, accounting and reporting for toxic substances referred to above and am familiar with its contents, and to my knowledge the information contained in the report is factually accurate and the report complies with the Toxic Reduction Act, 2009 and Ontario Regulation 455/09 (General) made under that Act.
